

Where the Conversion Leaks Are

example.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the homepage's primary call-to-action, but it is currently a dead end that exits to an external documentation site, and the page lacks any value proposition or trust signals to motivate a click. This bleeds value by sending visitors away without a next step, while the absence of a clear offer and trust elements further suppresses conversion.

#	Finding	Severity	Effort	PXL
1	Missing security headers 6 of 6 standard security headers are absent, which weakens protection against XSS, clickjacking and downgrade...	Medium	Medium	6/10
2	Single-step funnel with dead end The sole CTA exits to an external documentation site, leaving no in-page next step toward any conversion.	Urgent	Medium	5/10
3	No value proposition stated The page copy only describes the domain's purpose for documentation examples and provides no statement of...	High	Low	5/10
4	Missing trust signals above the fold The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	5/10
5	CTA lacks context The only call-to-action, 'Learn more', provides no indication of what the visitor will learn or why they...	Medium	Low	5/10
6	Weak page metadata Search and social previews are degraded: page title (absent), meta description, Open Graph tags are missing...	Medium	Medium	5/10
7	No responsive viewport declared Without a viewport meta tag mobile browsers render the desktop layout scaled down, making every tap target...	Urgent	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those

items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
